MRS-675

TECHNICAL DATA

CLEAN and SHINE

DESCRIPTION:

MRS-675 CLEAN and SHINE is a universal product used to remove smudges, finger prints, dust, hazing and other contaminants from surfaces such as glass, chrome, mirrors, automotive interiors, vinyl and automotive paint. **MRS-675 CLEAN and SHINE** leave a smooth surface with a brilliant gloss. This product can also be used as a sandpaper lubricant when wet-sanding clearcoats and a wetting agent for compounds. It can also be used as a lubricant for clay products.

MRS-675 CLEAN and SHINE is body shop safe.

FEATURES:

- ✓ Body Shop safe
- ✓ Packaged in a quart with a spray applicator
- ✓ Also available in gallons
- ✓ Leaves no haze or smudges; wipes clean leaving a uniform gloss

APPLICATION:

To Clean and Shine a Surface

1. If surface is oxidized, it must be cleaned with compound or polish before applying. Apply to a clean, cool surface. Do not apply in sunlight.
2. Apply directly to the surface
3. Wipe surface clean with a **RS-622** micro-fiber cloth.

As a Wetting Agent for Compound

1. Apply compound to panel and buff according to recommendations. To rejuvenate the compound, mist a little **MRS-675** on the surface and continue to buff. Do not buff the surface dry. Wipe the surface with a micro fiber cloth.

As a Sandpaper Lubricant

1. Soak the sandpaper in water according to company's recommendations. Begin sanding the clearcoat using water. Once the surface is broken, clean with water and mist **MRS-675** on the surface and continue sanding to desired smoothness.
