RS-600

TECHNICAL DATA

Acry-Lac

DESCRIPTION:

RS-600 Acry-Lac Super Cleaner is a blend of solvents that allow the worker to remove any adhesive, coating or sealant from an acrylic surface without harming existing paint. RS-600 is very effective at removing road dirt from rocker panels, valances and similar parts. It also works very well for removing dirt and grime from interior vinyl.

APPLICATION:

1. No shaking is necessary.
2. Dampen shop cloth with RS-600.
3. Lightly rub the area to be cleaned using long, even strokes.
4. Do not rub hard on new paint.
5. Suitable for use on all automotive finishes.

ADVANTAGES:

- Will not leave a residue like most adhesive cleaners
- Due to a unique blend of solvents, RS-600 cleans a wider variety of substances faster than competitive brands.
