RS-1100

TECHNICAL DATA

Universal Flex Agent

DESCRIPTION:

RS-1100 Universal Flex Agent is a premium quality paint additive designed to add flexibility to all types of paint systems. RS-1100 mixes easily with all paints and when used at recommended ratios, absolutely will not gel paint. (Not intended to be used in urethane basecoat on basecoat/clearcoat systems). RS-1100 is water clear and therefore will not change paint color even in medium metallic colors. Dry time is not adversely affected and gloss retention is very good. RS-1100 causes acrylic lacquers to flow out smoothly. Enhances adhesion to all types of OEM or aftermarket parts. Can be used on all types of plastic or urethane body panels including fiberglass.

FEATURES:

1. Universal acrylic formula.
2. Water clear color (no amber cast).
3. Specially selected flexible resins.
4. Low hazard compound.
5. Excellent gloss retention and flow out.
6. Fast dry.
7. Excellent weather resistance.

BENEFITS: RUBBER-SEAL®

1. Perfect compatibility with all brands lacquer, enamel and urethane clearcoats.
2. Will not distort paint color. Flex parts will match hard parts. Cause paint system to conform and flex with part eliminating cracks and/or flaking.
3. No isocyanates.
4. Holds good gloss while drying. No buffing is usually necessary.
5. Fast tack-free time. Can be buffed next-day if necessary.
6. Won't dull or fade even after years of sun exposure.
