RS-2050

TECHNICAL DATA

"Super Kick" Accelerator

DESCRIPTION:

RS-2050 "Super Kick" is a premium, high potency accelerator specifically designed for acrylic and polyurethane clears, paints and catalyzed polyurethane primers. This accelerator outperforms competitive brands in helping the above systems tack and cure quicker. It will effectively reduce sand and buff times to substantially increase productivity.

FEATURES:

1. Universal formula.
2. Promotes thorough cure.
3. High productivity.
4. Enhances primer effectiveness.

BENEFITS:

1. Works in all catalyzed clears, paints and 2 component urethane primers.
2. Finishes become durable much faster.
3. Dramatically reduces sand and buff times.
4. Better color holdout and sealing properties.

APPLICATION INSTRUCTIONS:

1. Use up to two ounces of RS-2050 "Super Kick" per paint cup full of catalyzed urethane primer. RS-784 urethane primer can be dry sanded within 60-90 minutes when accelerated. Can be wet sanded within 15-30 minutes.

NOTE: Clean equipment after use to avoid primer gelling in gun.
