

RS-208/226

TECHNICAL DATA

Firm Set Seam-N-Joint Sealer

DESCRIPTION:

RS-208 and RS-226 Firm Set Seam-N-Joint Sealer is the fastest curing of all the Rubber-Seal seam sealers. Firm Set allows ample time for tooling and can still be painted 30-60 minutes after applied. Firm Set smooths easily and all rough edges or fingerprints disappear without the use of solvent. Super durable and flexible properties eliminate all cracking problems. Minimal shrinkage.

APPLICATION:

1. Be sure material and surfaces are at room temperature (72°F).
2. Apply only to clean, dry surfaces.
3. Smooth out with tool or finger and feather-edge with a little Rubber-Seal Acry-Lac.
4. Any type of paint can be applied after 30 minutes.
5. Clean any excess with Acry-Lac before Firm Set sets up.

FEATURES AND BENEFITS:

Features:

- Rubber base
- Fast setting formula
- Displaces water
- Compatible with all paints
- Self smoothing formula
- Lump free formula
- Superior adhesion
- Available in black (RS-208) or white (RS-226)

Benefits:

- Full 360° flexibility
- Skin time 1-2 minutes. Cure 60 minutes
- Seals on wet or dry surfaces
- Coat with any type of paint in 30-60 minutes
- No tooling solvent needed
- Leaves perfect feather edge
- Sticks to all types of painted, primed or unpainted surfaces
- Coats easily with light or dark color
