RS-529

TECHNICAL DATA

Super Solv

DESCRIPTION:

RS-529 Super Solv is a premium quality all purpose solvent that leaves no unwanted residue. Super Solv is excellent for cleaning all types of dirt, grease, oil, silicone, and road scum. Super Solv is water clear and will not stain or etch cured paint. Super Solv can be safely used on most interior trim parts to remove dirt or grease and works especially well for removing adhesive residue on exterior painted surfaces. Super Solv works very well as a release agent and as a liquid sanding solvent. When sprayed in areas that cannot be sanded, Super Solv will sufficiently remove contaminants and slightly soften paint surface so it will accept new paint. Super Solv will quickly release bodyside moldings, emblems, weatherstrips and decals without harming the paint.

APPLICATION:

1. Apply to all types of surfaces to remove dirt, grease, glue, etc.
2. Can be applied directly to surface or to clean cloth.
3. Do not rub hard on paint surfaces.
4. Test in hidden place on new paint surfaces before using.
